DETAILED ACTION

Examiner's Amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

In accordance with discussions made in a telephone interview with the inventor's representative, Mr. James A. Flight on September 17, the following changes have been made:

In claim 12, last line, replace "optoelectronic" with -- flip-chip --.

In claim 22, last line, delete the second period ".".

Allowable Subject Matter

2. Claims 1 - 31 are allowed.

3. The following is an examiner's statement of reasons for allowance: Regarding independent claim 1, a review of prior art failed to make obvious, disclose or fairly suggest an apparatus comprising an optical solder which protects the optical element during a metallic soldering of the optoelectronic chip to the substrate in addition to the accompanying features of the claims.

Regarding independent claim 12, a review of prior art failed to make obvious, disclose or fairly suggest an apparatus comprising an optical solder which protects the

optically active area during a metallic soldering of the flip-chip to the substrate in addition to the accompanying features of the claims.

Regarding independent claim 18, a review of prior art failed to make obvious, disclose or fairly suggest a method of mounting a flip-chip to a substrate comprising an optical solder that couples an optically active area of a flip-chip to the waveguide and solder bumps couple the flip-chip to the substrate in addition to the accompanying features of the claim.

Claims 2-11; 13-17; and 19-31 are allowed by virtue of their dependence upon independent claims 1, 12 and 18 respectively.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patent Application Publication 2004/0118599 to Chason et al. and U.S. Patent Application Publication 2004/0057648 to Yumus both describe coupling an optoelectronic chip to a waveguide on a substrate. In both applications, the chip is electrically soldered to a substrate with a waveguide.
